

INDULINE® ISOBUS PVC & ISOBUS PUR

ISOBUS is used worldwide as a uniform communication standard in agriculture. The hybrid cables simultaneously transmit energy and data between tractors and connected implements such as field sprayers, seed drills, balers, etc.

The cables comply with the requirements of the ISOBUS standard in accordance with ISO 11783-2 and ensure secure and reliable communication between tractors, attachments, and agricultural control systems.

INDULINE® ISOBUS PUR

BUS | FELDBUS Cables for agricultural vehicles and machinery

- Highly resistant to fats, coolants, and lubricants
- Oil-resistant according to DIN EN 60811-2-1
- Flame-retardant
- Abrasion- and notch-resistant
- Low adhesion surface
- Resistant to hydrolysis and microbes
- UV-resistant according to HD 605 A1
- Ozone resistant according to VDE 0472 Part 805

INDULINE® ISOBUS PVC

BUS | FELDBUS Cables for agricultural vehicles and machinery

- Highly resistant to fats, coolants, and lubricants
- Oil resistant according to DIN EN 60811-2-1 (only mineral oil)
- UV resistant
- Cost-optimized variant

Also available as assembled product according to customer requirements.
