Statement - Responsible supply chain management

Dear Business Partner,

Millions of people worldwide live in misery and hardship because minimum social standards such as the ban on forced and child labor are disregarded. 79 million children worldwide work under exploitative conditions: in textile factories, quarries or on coffee plantations – probably also for our kind of products.

To change this, the German government agreed on a draft law with the official name Supply Chain Due Diligence Act (Lieferkettensorgfaltspflichtengesetz – LkSG)
It came into force in January 2023. The aim is to improve the protection of human rights and environmental protection in global supply chains.

We also take responsibility in this sense by demanding our business partners and suppliers to adhere to the values and behaviors which we have also imposed on ourselves. Through a Code of Conduct, we expect our suppliers to act with integrity which goes beyond respect for human and labor rights and environmental protection.

The Cable Connectivity Group, an Infinite Electronics company, operates internationally. As a company, we do everything to support and respect internationally recognized human rights and environmental requirements. CCG recognizes the relevant standards and principles as set forth in the Universal Declaration of Human Rights, and we respect the host countries in which we we operate, but in no way tolerate corruption or human rights abuses.
